

Change Summary

- Project: codexa
- Worktree: /srv/worktree/codexa/codex/20260624-094437-focus-orientation
- Branch: codex/general/codexa-20260624-094437-focus-orientation
- Base: main
- Primary commit: 373fb78
- Subject: fix(mcp): isolate workspace session routing

Changed Files

373fb78 fix(mcp): isolate workspace session routing

src/cli.ts | 9 +++-

src/mcp-repo-root.ts | 58 ++++++++-----

tests/cli-hooks.test.ts | 59 ++++++++-----

tests/mcp.test.ts | 116 ++++++++-----

Verification

- git diff --check: passed
- npm run check: passed
- Codexa not wired: no .codex/config.toml
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Adversarial hardening resolved two routing defects: unscoped shared workspace roots now fail closed when shared focus conflicts with active session rows, and selected workspace sessions must match an active row before any shared focus/default fallback is considered. CLI query commands now keep explicit git repo arguments authoritative even when focus-worktree environment variables are exported.

Additional Codexa evidence: change-plan and test-plan ran through CODEXAWORKSPACESESSION for this worktree; post-edit-review remained inspect because src/cli.ts was added during the second adversarial finding after the initial snapshot, while targeted tests and required dependency checks were accounted for.

Manual live probes also verified unscoped /srv fails closed, --workspace-session routes to this Codexa worktree, and explicit /srv/codexa status remains pinned under focus env.
