

Change Summary

- Project: codexa
- Worktree: isolated Codexa worktree
- Branch: codex/general/codexa-20260711-codexa-verification-runner-hardening
- Base: main
- Primary commit: 9085e45
- Subject: feat(verification): harden runner classification

Changed Files

9085e45 feat(verification): harden runner classification

Verification

- git diff --check: passed
- npm run check: passed
- npm run eval:ci: passed
- npm run benchmark:ci: passed
- npm run smoke:package: passed
- npm run package:hygiene: passed
- npm audit --audit-level=moderate: passed
- Codexa post-edit-review: passed; local artifact retained outside the repository
- Codexa test-plan: generated; local artifact retained outside the repository
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Implements the next highest-ROI Codexa verification phase: deterministic real-shell differential safety, fail-closed targeted Playwright Test credit, adjacent runner hardening, and classifier provenance v4.
