

Change Summary

- Project: codexa
- Checkout: isolated codexa task worktree
- Branch: codex/general/codexa-019f985f-f2aa-7853-a8ec-78ad4943ea5c
- Base: main
- Primary commit: 6981ea6
- Subject: fix(review): complete broad post-edit authority

Changed Files

6981ea6 fix(review): complete broad post-edit authority

Verification

- git diff --check: passed
- npm run typecheck && npm run lint && npx vitest run tests/post-edit-review-coverage.test.ts tests/post-edit-review-coverage-validation.test.ts tests/recommend-tests-change-type.test.ts: passed
- Codexa skipped: Exact local follow-up with raw source evidence, deterministic host gates, and two completed adversarial reviews; Codexa routing requires zero calls here.
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Closes the broad-scope post-edit deadlock reported on PR 120. Coverage is exhaustive through bounded logical passes with one task-global context call, full internal decision evidence, fail-closed explicit targets, schema-v2 receipts, bounded concurrency, and pre-indexed scale paths. This follow-up preserves the four previously implemented workflow improvements and incorporates both risk-budgeted adversarial reviews.
