create mode 100644 src/scip-import.ts
```

Verification

- git diff --check: passed
- bash -lc 'source /path/to/nvm.sh && nvm use 22.22.2 >/dev/null && npm run check': passed
- Codexa post-edit-review: passed manually with Verdict: continue after final-scope snapshot refresh
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Adds a JSON-only SCIP import lane that converts scip print --json output into CodexaSymbolReportV1 artifacts for derived symbol and relationship context without vendoring or running SCIP indexers.
