

Change Summary

- Project: codexa
- Worktree: isolated codexa worktree
- Branch: claude/general/codexa-20260704-091747-focus-orientation
- Base: main
- Source head before artifact refresh: 405f906
- Subject: feat(mcp): surface workspace skill hints

Changed Files

- src/skill-hints.ts
- src/init.ts
- src/query/context.ts
- src/mcp/compaction.ts
- src/mcp/resources.ts
- src/types/query-data.ts
- tests/init.test.ts
- tests/mcp-01-keeps-the-primary-mcp-happy.test.ts
- Summary artifacts under docs/pr-summaries/

Diff stat before artifact refresh:

Commit Stack

- a076e15 feat(mcp): surface workspace skill hints
- 16cc35a docs(workflow): add PR summary for codexa
- 6484259 fix(mcp): avoid workspace paths in skill hints
- 16aadd8 fix(mcp): harden skill hint config parsing
- 911ed7f fix(mcp): redact workspace skill hint surfaces
- a779398 test(mcp): keep redaction fixtures public-safe
- 161ad91 docs(workflow): refresh Codexa PR summary artifacts
- ef0ea84 fix(mcp): close skill hint trust boundaries
- 405f906 test(mcp): assert symlinked skill roots stay opaque

Verification

- npm run test -- tests/init.test.ts tests/mcp-01-keeps-the-primary-mcp-happy.test.ts: passed, 53 tests
- npm run test -- tests/mcp-01-keeps-the-primary-mcp-happy.test.ts: passed, 21 tests
- npm run privacy: passed
- git diff --check: passed
- npm run check: passed, including typecheck, lint, privacy, Claude Code integration tests, build, and Vitest
- npm run security:check: passed, including full check, npm audit, public snapshot check, package hygiene, plugin hygiene, and package install smoke
- Claude Code integration tests: 77 passed
- Vitest: 39 files passed, 400 tests passed

- npm audit: 0 vulnerabilities
- package smoke: 25 checks passed against the packed package
- Adversarial review: actionable findings fixed in follow-up Conventional Commits
- git diff --check: passed

Notes

Implements the portable Codexa portion of the workspace audit remediation: bounded workspace session-start digest, configured skill/playbook hints, structured MCP compaction, and regression coverage.

Hardening follow-ups keep repo-controlled skill-hint config contained to repo-local real paths, render malformed config warnings instead of hiding them, redact workspace session claims and freeform next text from session-start summaries, require scanned skills before emitting actionable skill hints, make glob matching cover direct children, and keep redaction fixtures public-safe.
