

Change Summary

- Project: codexa
- Worktree: isolated codexa worktree
- Branch: codex/review/codexa-codexa-value-audit-20260626
- Base: main
- Primary commit: 893d343
- Subject: fix(test-plan): require explicit verification scope

Summary

Codexa testplan now requires a real verification scope instead of inventing work from ranked repository files. It accepts explicit target files through CLI and MCP, validates unsafe or unindexed targets as gaps, and returns needstarget with no tests or commands when there is no diff and no explicit target.

The change also aligns docs, generated guidance, eval scoring, and session memory so targetless no-op plans do not become durable verification noise.

Changed Areas

- src/query/test-plan.ts: target-aware scope selection and no-target behavior.
- src/mcp/tools.ts, src/cli.ts, src/types.ts, src/mcp/compaction.ts: public contract and structured output updates.
- src/eval.ts, src/eval/scoring.ts, src/eval/types.ts: eval guardrail for clean/no-scope test plans.
- src/session-memory/derivation.ts: suppress no-op targetless test-plan memory.
- README.md, docs/architecture/codexa-context-server.md, docs/guides/new-user-tutorial.md, src/artifacts.ts: guidance now points agents to explicit files before verification planning.
- tests/: regression coverage for query, MCP, eval, and session-memory paths.
- docs/plans/codexa-target-aware-test-plan-2026-06-26.md: saved root-cause plan and adversarial hardening review.

Verification

- npm run check: passed.
- npm run eval:ci: passed, 21 scenarios, score 1, rawRgBetter 0.
- CLI clean/no-target probe: returned needstarget, 0 tests, 0 commands.
- CLI explicit target probe: returned a scoped plan for src/query/test-plan.ts.
- Invalid-target dirty-tree probe: rejected ../outside.ts and did not fall back to dirty diff tests.
- Final Codexa clean test-plan: fresh, targetless, no invented work.

Review Notes

- The branch is intentionally one functional commit plus this summary artifact commit.
- Generated local Codexa cache and codebase artifacts are ignored and are not part of the PR.
