Verification

- git diff --check: passed
- npm run check: passed
- npm run smoke:package: passed
- npm run package:hygiene: passed
- npm run audit: passed
- Codexa post-edit-review: passed
- Codexa test-plan: passed
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Adds one deterministic committed-change receipt shared by the CLI, MCP, and a read-only GitHub Action, with optional CI scaffolding through `codexa init --ci`. Includes bounded Git handling, trust-aware plan and verification evidence, package smoke coverage, and adversarial regression tests.
