Verification

- git diff --check: passed
- npm run check: passed
- git diff --check: passed
- Codexa post-edit-review: local artifact recorded
- Codexa test-plan: local artifact recorded
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Adds deterministic functional clusters, structured relational packet JSON, bounded graph export JSON, and opt-in summary prompt records for local graph-RAG workflows. Keeps SCIP/LSP/external summarization as provenance/prompt seams without adding runtime network or database dependencies.
