

Change Summary

- Project: codexa
- Worker checkout: isolated worktree (local path omitted)
- Branch: codex/general/codexa-20260710-005638-focus-orientation
- Base: main
- Primary commit: 0985f1f
- Subject: feat(verification): expose trust tiers and scale semantic indexing

Changed Files

0985f1f feat(verification): expose trust tiers and scale semantic indexing

Verification

- git diff --check: passed
- env -u CODEXA_WORKSPACE_SESSION -u CODEXA_WORKSPACE_FOCUS_FILE -u SESSION_ID npm run check: passed
- env -u CODEXA_WORKSPACE_SESSION -u CODEXA_WORKSPACE_FOCUS_FILE -u SESSION_ID npm run eval:ci: passed
- env -u CODEXA_WORKSPACE_SESSION -u CODEXA_WORKSPACE_FOCUS_FILE -u SESSION_ID npm run benchmark:ci: passed
- env -u CODEXA_WORKSPACE_SESSION -u CODEXA_WORKSPACE_FOCUS_FILE -u SESSION_ID npm run smoke:package: passed

- npm run package:hygiene: passed
- npm audit --audit-level=moderate: passed
- Codexa post-edit-review: passed; local review artifact generated
- Codexa test-plan: passed; local test-plan artifact generated
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Implements the reviewed competitive optimization plan: first-class verification trust provenance and deterministic semantic-assist scaling. Includes current-source competitor analysis, full regression coverage, and observed cold-index improvement with no new public verb or runtime dependency.

PR Review Follow-ups

- External review found that command-backed required dependency checks still emitted ledger trust none.
- Fixed required-check evaluation and ledger propagation while preserving none for graph/file-only evidence.
- Added structural, reported, executed AutoVerify, and integration regressions.
- A second external review found that unrun context recommendations could appear as trust reported.
- Centralized preview normalization now forces context, test-plan, grouped command-plan, and ledger-preview trust to none until evidence is actually reported or executed.
- Added task-brief and test-plan production-path assertions for the fail-closed preview contract.
- Latest full gate: 44 test files and 425 tests passed; 21/21 eval scenarios, every benchmark threshold, 25 package-smoke checks, package/plugin hygiene, privacy, and audit remain green.
