

Change Summary

- Project: codexa
- Worktree: isolated feature checkout
- Branch: codex/general/codexa-20260714-codexa-usefulness-repairs
- Base: main
- Primary commit: 2817e73
- Subject: fix(workflows): harden usefulness validation

Verification

- git diff --check: passed
- CODEXA_RUN_V012_TRANSPORT_COMPAT=1 npm run test -- tests/benchmark-mcp-transport.test.ts tests/command.test.ts: passed
- npm run check: passed
- npm run smoke:package: passed
- npm run eval:ci: passed
- npm run benchmark:ci: passed
- npm run benchmark:transport:exposure -- --repo <clean-candidate-checkout>: passed
- npm run benchmark:transport -- --repo <clean-candidate-checkout>: passed
- node scripts/agent-ab.mjs validate --config benchmarks/agent-ab/experiment.json: passed
- Codexa post-edit-review: passed (local completion artifact)
- Codexa test-plan: passed (local completion artifact)
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Repairs pinned transport benchmark reproducibility and CLI verification help, adds CI coverage, and commits an evidence-gated plan for measuring agent utility without overstating the current evidence.
