

Change Summary

- Project: codexa
- Checkout: isolated codexa task worktree
- Branch: codex/general/codexa-20260718-000156-focus-orientation
- Base: main
- Primary commit: 803460f
- Subject: perf(mcp): reduce agentic Codexa overhead

Changed Files

803460f perf(mcp): reduce agentic Codexa overhead

Verification

- git diff --check: passed
- npm run check: passed
- npm run package:hygiene: passed
- Codexa post-edit-review: generated as a local verification artifact
- Codexa verdict replan (none) accepted over block: The saved plan predates reviewer-driven transport, documentation, and bare-launch default fixes. Codexa reports no unaccounted tests, while the full gate, package hygiene, clean transport benchmark, and two independent audits cover the integrated diff.
- Codexa test-plan: generated as a local verification artifact
- git diff --cached --check: passed
- staged safety scan: passed

Notes

Defaults every agent launcher to the 3-tool core surface while preserving 22 logical operations through capabilities. Adds terminal guidance, managed-hook coalescing, hard ToolResult budgets, and a deterministic decoded-payload benchmark. Clean-fixture tools/list bytes fall from 68,134 to 8,745 and startup advertisement plus discovery from 87,682 to 28,293. These are decoded JSON byte proxies, not model-token measurements.
